09/17/2020 - Office Visit: INF. Progress NOTES
Provider: Syed Rizvi, MD
Location of Care: Building 5 Level 1 Infirmary

This pt. complained of chest pain and left side weakness. He was sent to Uh, stayed there (9/12/20 thru 9/16/20) when he was brought to INF. last night.
The Hosp. discharge notes states- Stroke, adv.- aspirin, nifedipine and low salt diet.
Plz. see admitting notes of Dr. P, dated 9/16/20
On Exam.- This 58 yrs./o/m first thing he tell me, he is doing alright, there is no weakness and he wants to go out of INF.
Heart- RSR. Lungs- Clear. Abd.- Soft, non-tender. Cns & Reflexes- Grossly normal.
Assessment.- Hosp. Dx.- Stroke ?? / Asymptomatic.
Plan.- Continue Rx as written// need hospital report // follow up in AM by Dr. P. in AM. She is admitting MD and, luckily a neurologist; so she can discharge if she feels appropriate.

General Note

The pt. is a 58 y/o M presenting to PT s/p R stroke with L sided UE and LE weakness. L shoulder elevation performed to 90 degrees with moderate pain. Weakness through the L shoulder 3-/5. The pt. has insatiability in the L knee secondary to quad weakness resulting in knee buckling and the need for a RW with gait. L knee ROM is limited to 10-90 degrees. L LE strength is 3+/5 throughout. The pt. will require extensive strengthening and ROM exercises of the L LE and UE. The pt. will require PT to wean AD, improve gait, and improve his ability to utilize the L UE for functional tasks. The pt. will require PT once a week for 6 weeks.

02/26/2021 - General Note: Physical Therapy

Provider: Steven Kreh

Location of Care: ESSEX COUNTY CORRECTIONAL FACILITY

General Note

The pt. demonstrated a mild improvement in quad control, but still lacks the ability to achieve TKE which results in buckling. The pt. had great difficulty with hip strengthening secondary to weakness. L shoulder elevation without assistance is at about 90 degrees, and with PT assistance is at 165 degrees. Severe weakness remains in the L shoulder, as well as the LE. Long term strengthening will continue to be necessary.

03/12/2021 - General Note: Physical Therapy

Provider: Steven Kreh

Location of Care: ESSEX COUNTY CORRECTIONAL FACILITY

General Note

The pt. reports continued buckling of the L knee and difficulty raising the shoulder. PT worked on TKE in striding and via quad sets. The pt. was able to perform 50% of a SLR. Bridges were also performed and they were difficult. L shoulder isometrics and AAROM was also performed. The pt. is demonstrating increased ability to elevate the L shoulder. The pt. will require continued strengthening of the LUE and L LE.

Refused to Take

03/23/2021 - General Note: Physical Therapy

Provider: Steven Kreh

Location of Care: ESSEX COUNTY CORRECTIONAL FACILITY

General Note

The pt. returned for PT. Quad control is improving and the pt. is able to perform 3 SLR with extreme difficulty. TKE remains difficult as well, as there is a minor knee extension lag. Asymmetrical pelvic control is present during bridges. L hip abduction is improving. L shoulder PROM remains full, but the pt. is only able to perform 50% of the ROM actively. The pt. require scontinued strengthening and motor control training.

Comment

03/30/2021 - General Note: Physical Therapy
Provider: Steven Kreh
Location of Care: ESSEX COUNTY CORRECTIONAL FACILITY

General Note

The pt. demonstrated improved L quad contraction with better TKE. Spasticity contributes to tightness in the hip and HS. L LE abduction has improved. Overall the pt. is progressing with LE strengthening, but the L shoulder ROM remains limited and requires further stretching.
